AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

This operation (Courthouse Cooler) is dedicated to cooling and storing various varieties of Broccoli, Cauliflower, Melons, and Watermelons grown on the Marotari Farms. The Melons were subjected to forced air cooling to remove field heat and then maintained in the coolers at a set temperature until shipping. Product inventory and traceability were managed using Famous Software. Richard Sydenstricker managed the food safety program with support from food safety consultants from Global Food Safety Consultants. There is no repacking of the product; it is just cooling, storage, and shipping. Organic and conventional products are stored here, separated and easily identifiable.

AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

The Company grows watermelons, cantaloupe, and honeydew melons in the summer season, and there are 90 workers at the time of the audit. The cantaloupes were sanitized using a washer system. Water cascades over the fruit at 160-190 degrees F (6-8 sec). After the hot treatment, the fruits were sanitized using a PAA spray system (Application of Sodium Hypochlorite. 12.5%). Water temperature was constantly monitored and logged. After pre-treatment, the Cantaloupes were dried, sorted, and packed into various pack types and then taken into coolers with forced air cooling. Other Melons and watermelons were field-packed and taken to the facility for cooling and storage. The Company's on-site lab carried out various tests on products, equipment, and the environment.
